EDUCATION

Bachelor of Technology in Computer Science and Engineering

2020 – 2024

Uttaranchal University — CGPA: 8.7

EXPERIENCE

Senior Associate Software Engineer — TechBridge

Jan 2026 – Present

- Build and maintain UI/Backend modules for government projects TBPAM and TBSOAR.
- Improve component reusability and code quality through regular reviews with cross-functional teams.

Software Engineer — Predigle

Jul 2025 – Nov 2025

- Built micro-frontend components in Angular for the Pandora and Espersshield projects.
- Integrated Python APIs to connect frontend and backend functionality seamlessly.

Associate Software Engineer — Rubico IT Private Limited

Feb 2024 – Jun 2025

- Built reliable APIs with SQL transactions and locks in Angular to ensure data integrity.
- Delivered Pixel Manipulation and Pixel Maker features, including real-time sync through Firebase.
- Improved app performance and load times through debugging and reusable UI components.

PROJECTS

Revenant — Published on GitHub Marketplace

CLI and GitHub Action (Go) that proves database backups actually restore, not just that they exist. —

github.com/marketplace/actions/revenant-restore-validation

- Automates the full recovery-proof loop: restores the latest AWS RDS snapshot to a sandbox, runs validation, and tears it down.
- Language-agnostic by design — validates live database state only, so it works with any app stack (Node, Python, Go, Rails).
- Built a YAML-based check system (schema, row count, foreign key, freshness, golden query) with JSON/Markdown CI reports.

React-Form-Toaster — Published on NPM

React form library with a good number of downloads, enabling developers to create dynamic forms effortlessly.

- Built for speed of integration: developers can wire up a working form in under a minute.
- Included built-in, customizable validation powered by Zod, with full TypeScript typings for safer form logic.
- Supports dynamic form generation from field definitions and labels, backed by pre-styled, fully customizable components.

TECHNICAL SKILLS

Languages & Frameworks: TypeScript, JavaScript, Go, AngularJS, Node.js, Nest.js, Express.js, Fastify, Next.js, React.js, Framer, GSAP, Tailwind CSS, HTML

Databases: MySQL, PostgreSQL, Firebase, MongoDB

Cloud & Deployment: Docker, AWS S3, API Gateway, GitHub

AI Tools: ChatGPT, Gemini, GitHub Copilot, Cursor, Claude

COURSES & CERTIFICATIONS

- JavaScript Certification — Udemy
- CAD Certification — ServiceNow
- System Design Masterclass — Arpit Bhayani
